

COMMAND

PLATFORM OVERVIEW

One platform for
connected operations

ENERGY / MARITIME / LOGISTICS / PORTS

VETRA Command brings teams, companies, projects, documents and operational activities into one coordinated workspace.

DIRECT THE WORK

Projects, tasks, locations and accountable owners

CONTROL THE RECORD

Due diligence, documents and authorized access

SEE THE OPERATION

Voyages, logistics, budgets and management reports

CONNECTED OPERATIONS

Bring energy, maritime shipping, logistics and port activities into one project context

ENERGY AND OIL

Coordinate commercial, technical, regulatory and transaction work around energy products and assets

MARITIME AND VOYAGES

Link vessels, voyages and port calls with controlled Alongside, Loading and Discharging stages

PORTS AND TERMINALS

Coordinate berthing, cargo handling, inspections, clearance, storage and release

LOGISTICS AND CARGO

Connect shipments, trucking, warehousing, customs and responsible teams across each handoff

STRUCTURED LOCATIONS

Mandatory country and city on projects and tasks, with facilities, ports, addresses, time zones, GPS coordinates and origin / destination as applicable

LIVE VESSEL AND ASSET DATA

Connect authorized AIS and GPS providers to the relevant shipment, company or project. Distinguish provider data from manual updates and show freshness.

INTEGRATION REQUIRED

PROJECT CONTROL AND COLLABORATION

Keep responsibilities, evidence, financial plans and management information connected

PROJECTS AND TASKS

Set owners, deadlines, dependencies and approvals. Due diligence and outstanding-item registers connect evidence to the people responsible.

DOCUMENT CONTROL

Use project data rooms, version history and scoped sharing. Protected viewing, watermarks and download limits follow the enabled workspace controls.

BUDGETS AND CONTINGENCY

Plan by fiscal year, calculate currencies and retain budget history. Show core expenditure and contingency reserves separately.

RELEVANT NOTIFICATIONS

Project updates, submissions, status changes and completion events reach the appropriate authorized participants.

SCHEDULED REPORTS

Set recurrence and authorized recipients for progress, task and operational reports. The workflow covers actual files, delivery and recorded outcomes.

GOVERNANCE AND RECORDS

Super Admin oversight covers companies, teams, permissions and removal requests, including user and account removal, while preserving required history.

INTEGRATION REQUIRED

External email delivery for notifications and reports

CONNECTED ACCESS AND CONTINUITY

Manage account access, integrations and releases within the same coordinated environment

API INTEGRATION CENTER

Manage connections, credentials, company permissions, expiry dates and activity logs. Read-only and create / update access are defined per connector; two-way synchronization is not implied.

DEVICES AND SESSIONS

Review logged-in devices, browsers, IP addresses and recent activity. Disconnect individual sessions across office, mobile and shared work environments.

IDENTITY AND SECURITY

Role-based permissions, MFA enrollment and login verification support controlled access. Private storage and malware scanning connect to the configured services.

RELEASE DASHBOARD

Organize versions, changes, testing and release records. Connected deployment is a separate action, with the actual result recorded from the deployment system.

INSTALLABLE MOBILE EXPERIENCE

Home-screen installation brings supported online functions to compatible mobile devices for teams working away from their desks.

EXTERNAL CONNECTIONS

AIS, GPS, email, identity, private file storage, malware scanning and deployment depend on provider connections or configuration.

INTEGRATION REQUIRED

CONTROL EVERY CONNECTION
